# VELDEMAN STRUCTURE SOLUTIONS

## History

The success story of Veldeman Structure Solutions begins in 1970 as a small family business in Bree, Belgium. Founder Georges Veldeman, surrounded by an enthusiastic team of employees, developed the company into a worldwide leader in the manufacture and installation of fabric structures. These structures are offered for sale or hire and with frames of either aluminium or steel. A key stage in Veldeman's evolution was the acquisition of USA based Universal Fabric Structures in 2004 – Veldeman thus became a major force in the USA and Canada. Today Veldeman Structure Solutions is active in more than 30 countries.

## In-house expertise

In the production of top-quality products Veldeman makes use of the latest state of the art technologies. The company has a high-tech research and development department, an in-house fabric department and a metal department. Besides its own sales team, Veldeman has a global network of distributors and agents.

## Multifunctional structures

Veldeman offers solutions for a variety of different sectors, including industry, logistics, environment, sports, civil aviation and defence.

## Quality, safety and a full range of services

Besides delivering top-quality products, service, innovation and flexibility are central at Veldeman. Particular importance is attached to safety: the structures satisfy the most up to date international standards.

## Sustainability

Sustainable business is also an absolute priority for Veldeman. By paying attention to environmental, social and economic aspects the company aims to guarantee it's growth, cost-effectiveness and continuity and, at the same time, to minimize it's ecological footprint.

**Veldeman  
designs and  
builds customised  
temporary,  
semi-permanent  
and permanent  
structures.**

# VELDEMAN AND SPORT: A TOP TEAM

In Veldeman sports halls people can engage in their favourite sports summer and winter in the most comfortable conditions, whether it is tennis, winter sports, football, horse riding, swimming or other sports.

Veldeman Structure Solutions will design and build a high-quality solution to fit your specific needs, taking full account of safety, local bylaws and the environment.

## Veldeman offers you:

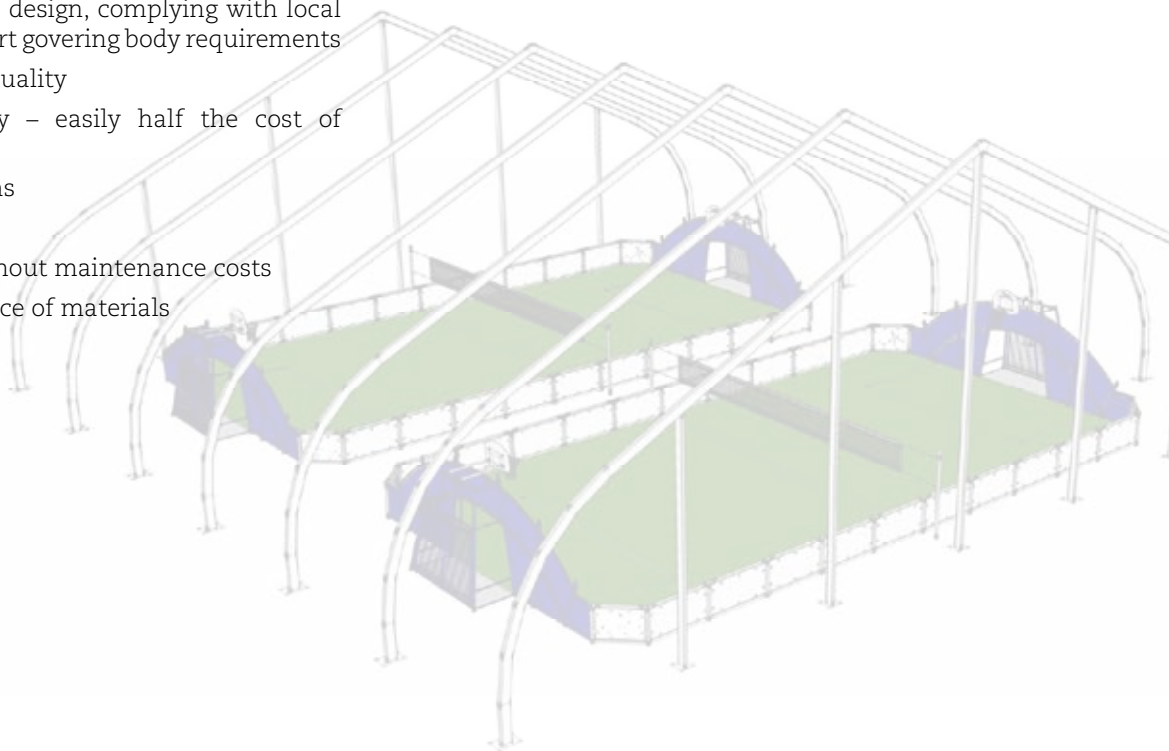

- » 40 years of experience and satisfied customers worldwide
- » bespoke solutions for all kinds of sports and weather
- » professional tailor-made design, complying with local structural codes and sport governing body requirements
- » craftsmanship and top quality
- » great value for money – easily half the cost of conventional buildings
- » a range of finance options
- » short delivery times
- » sustainable solution without maintenance costs
- » environment-aware choice of materials

If your local authority or sports club needs a new sports building, go for Veldeman Structure Solutions and contact our sports team. Our experts will be pleased to give you more information and support.

Do you quickly want to build sports accommodation at a competitive price in your area. Look no further: the versatile sports hall of Veldeman Structure Solutions is the unbeatable solution for large and small projects alike. Basketball, volleyball, table tennis, judo, ... every sports enthusiast will feel completely at home in our halls.

# TENNIS

## GAME, SET, VELDEMAN

Ever dreamt of enjoying tennis all year round? Veldeman tennis halls will fulfill that dream. No more interrupted games due to rain and heat, and players and public can enjoy this popular sport in absolute comfort. Worldwide, we have currently built more than 320 tennis halls, and even Justine Henin and Nick Bollettieri opted for a Veldeman hall for their Tennis Academy.

## WATER SPORTS WATER FUN ALL YEAR LONG

What about swimming lengths of the pool, summer and winter, without a care in the world? Thanks to a Veldeman Structure Solutions enclosure - with or without extra insulation - you can use your swimming pool all year round without your energy bill going through the roof.

# HORSE RIDING

## HORSE POWER BY VELDEMAN

Poor weather often adversely affects the behaviour and performance of horses. So why not opt for the flexible summer/winter solution of Veldeman Structure Solutions and cover your outdoor arena? Your horses will thank you and you will enjoy your favourite sport the entire year.

## WINTER SPORTS THE BIG VELDEMAN SLALOM

It's great to skate and ski in the open air, but generally it's feasible only in the very coldest winter months. Cover your skating rink or ski piste with a hall from Veldeman Structure Solutions and you'll be able to enjoy your favourite winter sport regardless of the weather. It's ideal for professional skaters and skiers, but also a great solution for general use.

# UNIQUE STRUCTURES

## WHY A VELDEMAN HALL IS THE BEST CHOICE:

1 and 2) Hall sides can be readily removed thus creating a semi open atmosphere in summer whilst protecting against glare, rain and overheating  
3) Effective insulation

4) Translucent roof and upper walls leads to great glare free light quality and keeps energy bills low  
5, 6 and 7) Rapid construction over new or existing facilities, without or with limited foundations - easily dismantled if required  
8) Exceptional stability in accordance with local bylaws
